LANGUAGES

French: Fluent

English: Intermediate

STRENGTHS

- Rigor
- Critical thinking
- Technical curiosity
- Autonomy
- Teamwork
- Professional ethics
- Confidentiality

EDUCATION

INSA Hauts-de-France

France, 2025 – Present

Master's in Cyber Defense and Information Security

HESTIM ENGINEERING BUSINESS SCHOOL

Casablanca, Morocco, 2025 – Present

Professional Master's in Cybersecurity

INSTITUT NATIONAL POLYTECHNIQUE FELIX HOUPHOUËT-BOIGNY

Ivory Coast, 2022 – 2025

Higher Technician Diploma (Bac+3) in Electronics, Computer Science and Telecommunications

Graduated with Honours (Mention Bien)

PROFILE

Dual-degree student at HESTIM-INSA Hauts-de-France, specializing in cyber defense and information security. My background combines skills in development, systems and databases, strengthened by hands-on projects in digital forensics, threat detection, attack simulation and vulnerability management.

PROFESSIONAL EXPERIENCE

Communications Manager — ELECTROCENTER

2026 - Present Freelance

- Design of posters, logos, carousels and digital communication materials.
- Video production, editing and motion design.
- Creation of content tailored to social media.
- Contribution to the communication strategy and visual identity of the company.

DevSecOps Intern - Application Deployment & PostgreSQL — BNETD

May 2025 - Jul. 2025 Ivory Coast

- Deployment of the web application and the PostgreSQL database on BNETD's server infrastructure.
- Configuration of the environments required for the solution to operate.
- Technical testing prior to go-live.
- Contribution to monitoring the application environment and applying security best practices.

Web Developer Intern & Geospatial Database Administration Assistant — BNETD | PADA Project

Jul. 2024 - Sep. 2024 Ivory Coast

- Development of a webmapping application for the visualization and use of geographic data.
- Design and management of a geospatial PostgreSQL database.
- Feature integration, testing and bug fixing of the application.
- Participation in the administration and use of the project data.

Pélé Abou Ouattara

Red Team · Blue Team · Digital Forensics · Detection Engineering · Vulnerability Management

TECHNICAL SKILLS

Offensive Security / Red Team

- Burp Suite
- Nmap
- Reconnaissance & enumeration
- JWT/JWT.io · Web/API security testing
- Exploitation in a controlled environment

Blue Team & Detection Engineering

- Security Onion
- Sysmon · Sigma · YARA
- Log analysis and detection

Digital Forensics & Network Analysis

- Wireshark · HTTP/DNS analysis
- Metadata and artifact analysis
- Evidence correlation
- Integrity verification

Systems & Vulnerability Management

- Linux · Windows
- CVE · CWE · CVSS · EPSS
- Vulnerability analysis and prioritization

Development, DevOps & Databases

- Python · PowerShell · Go
- JavaScript/TypeScript · React
- Git/GitHub · GitLab
- SQL · PostgreSQL · MySQL · Supabase
- Application deployment

CYBERSECURITY PROJECTS

VERITAS — Digital Forensics Platform

- Design of a platform assessing file integrity and authenticity: metadata, SHA-256, ELA, compression and evidence correlation.
- Generation of a Trust Score, an explainable verdict and an automated forensic report.

Technologies: React · TypeScript · Supabase · Digital Forensics

Project: Web App Link

Ransomware Simulation & Detection Lab

- Controlled simulation of targeted file encryption in an isolated environment, with a restoration mechanism and integrity verification.
- Instrumentation and detection with Sysmon, Sigma and YARA, followed by automated validation of detections.

Technologies: Python · PowerShell · Sysmon · Sigma · YARA · Chainsaw

Project: GitHub Link

Vulnerability Management & Prioritization

- Development of a vulnerability management and prioritization prototype based on CVE, CWE, CVSS and EPSS.
- Correlation of criticality and exploitation probability indicators to facilitate prioritization.

Technologies: Python · streamlit · CVE · CWE · CVSS · EPSS

Project: GitHub Link

Android Security Lab — Phishing PoC

- Development of an experimental Android application reproducing a phishing scenario in a controlled environment.
- Study of HTTP and API exchanges, authentication and user journey.

Technologies: Kotlin · Jetpack Compose · OkHttp · REST API

Project: LinkedIn Post Link
